Washington, DC 20554

Re: Written *Ex Parte* Submission in WT Docket No. 06-150

Dear Ms. Dortch:

Attached please find a copy of a new engineering report from the Columbia Telecommunications Corporation, prepared for the *Ad Hoc* Public Interest Spectrum Coalition (PISC). This report supplements the previous engineering report submitted on May 23, 2007.

As demonstrated in the report, neither an obligation to make wholesale capacity available nor an obligation to allow any network attachment that does not harm the network (sometimes referred to as “wireless *Carterfone*”) presents new technical challenges to the Commission. To the contrary, the proposed license conditions are comparable to technical requirements and standards development employed by the Commission in other proceedings.

The current membership of the *Ad Hoc* Public Interest Spectrum Coalition is (in alphabetical order): Acorn Active Media, the Champaign Urbana Wireless Internet Network, Consumer Federation of America, Consumers Union, EDUCAUSE, Free Press, Media Access Project, National Hispanic Media Coalition, New America Foundation, Public Knowledge, and U.S. PIRG.

Sincerely,

Harold Feld
Senior Vice President
